About the Author

Erik Westra has been a professional software developer for over 25 years, and has worked almost exclusively in Python for the past decade. Erik's early interest in graphical user-interface design led to the development of one of the most advanced urgent courier dispatch systems used by messenger and courier companies worldwide. In recent years, Erik has been involved in the design and implementation of systems matching seekers and providers of goods and services across a range of geographical areas. This work has included the creation of real-time geocoders and map-based views of constantly changing data. Erik is based in New Zealand, and works for companies worldwide.

"For Ruth,

The love of my life."

About the Reviewers

Tommi Juhola is a software development professional from Finland. He has a wide range of development experience from embedded systems to modern distributed enterprise systems in various roles, such as tester, developer, consultant, and trainer.

Currently, he works in a company called Lindorff and shares this time between development lead duties and helping other projects to adopt Scrum and agile methodologies. He likes to spend his free time with new and interesting development languages and frameworks.

Silas Toms is a GIS Analyst for ICF International, working at the San Francisco and San Jose offices. His undergraduate degree is in Geography (from Humboldt State University), and he is currently finishing a thesis for an MS in GIS at San Francisco State University. He has been a GIS professional for four years, working with many local and regional governments before taking his current position. Python experience was gained through classes at SFSU and professional experience. This is the first book he has helped review.

I would like to thank everyone at Packt Publishing for allowing me to help review this book and putting up with my ever-shifting schedule. I would also like to thank my family for being supportive in my quest to master this somewhat esoteric field, and for never asking if I am going to teach with this degree.

Do you need instant solutions to your IT questions? PacktLib is Packt's online digital book library. Here, you can access, read, and search across Packt's entire library of books.

Why Subscribe?

- Fully searchable across every book published by Packt
- Copy and paste, print, and bookmark content
- On demand and accessible via web browser

Free Access for Packt account holders

If you have an account with Packt at www.PacktPub.com, you can use this to access PacktLib today and view nine entirely free books. Simply use your login credentials for immediate access.

Table of Contents

Preface	1
Chapter 1: Geo-Spatial Development Using Python	7
Python	7
Geo-spatial development	9
Applications of geo-spatial development	11
Analyzing geo-spatial data	12
Visualizing geo-spatial data	13
Creating a geo-spatial mash-up	16
Recent developments	17
Summary	19
Chapter 2: GIS	21
Core GIS concepts	21
Location	22
Distance	25
Units	27
Projections	28
Cylindrical projections	29
Conic projections	31
Azimuthal projections	31
The nature of map projections	32
Coordinate systems	32
Datums	35
Shapes	36
GIS data formats	37
Working with GIS data manually	39
Summary	46
